Atlantic Container Line (ACL) is committed to providing continuity to its customers and vendors during a disruption to our business. ACL has developed Business Continuity Plans (BCP) in accordance with Homeland Security’s PS-PREP program to ensure continuity within the private sector. While it is not possible to predict the impact of a disaster or disruption, ACL has taken action to protect its customers and vendors.

**Objective**: To reduce the consequences of disruption to an acceptable level through execution of pre-established continuity and recovery procedures.

**Definition of a disaster or disruption**: A disaster or disruption is any event which key functions are not able to be performed due to the unavailability of infrastructure or staff.

- ACL has developed BCPs and have tested them against disruptions lasting from 8 hours to an excess of 6 months.
- ACL has contracted with the appropriate vendors to ensure real estate, infrastructure, assets, power generation, and connectivity in the event an alternate site is required.
- ACL has partnered with Disaster Kleenup International (DKI) to ensure expedited restoration to the original to minimize the effects of the disruption.
  - DKI will additionally aid ACL employees to expedite their return to work.
- All ACL BCPs are tested and updated quarterly, and a comprehensive test is conducted annually prior to the onset of the peak hurricane season.

Atlantic Container Line appreciates the partnerships it enjoys with its customers and vendors. We hope our preparedness will help ensure continuity for our business partners. If you have any questions regarding Atlantic Container Line’s Business Continuity Plan please contact your sales representative.
